

```
22 class CalendarProvider extends ChangeNotifier {
619   final List<JobImage> _newJobImages = [];
620
621   void deleteImage(int jobId, int imageId) async {
622     UserServiceCalendar jobService = UserServiceCalendar();
623     await jobService.deleteJobImage(jobId, imageId);
624   }
625
626   // Function to pick files (images and documents)
627   Future<void> pickFiles(BuildContext context) async {
628     FilePickerResult? result = await FilePicker.platform.pickFiles(
629       type: FileType.custom,
630       allowedExtensions: ['jpg', 'jpeg', 'png', 'pdf'],
631       allowMultiple: true,
632     );
633     if (result != null && result.files.isNotEmpty) {
634       // Check if the number of selected files exceeds the limit
635       if (result.files.length > 5) {
636         _showFileLimitExceededDialog(context);
637       }
638     }
639   }
```

Don't use 'BuildContext's across  
Filter (e.g. text, !exclude, !escape)
