**IMPORTANT * N**eed to add refresh event on all pages
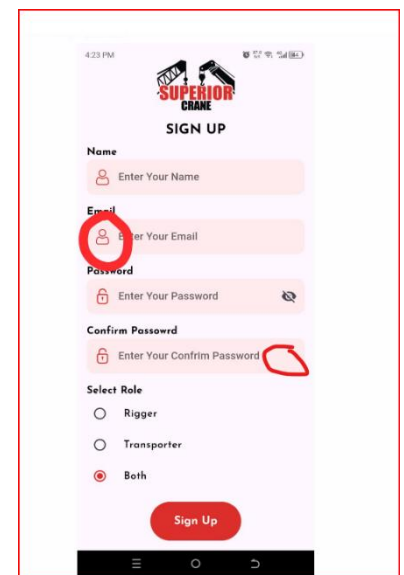

1. **Forget Password**
   a. Upon single press of a Send/Re Send button to get OTP, system is throwing two emails with two different OTPs
   b. When the user type OTP then the keyboard flickers.
   c. If OTP got expired and the user wants to add fresh OTP. It must revert simultaneously with the cross button, instead of taping each input field to cross it singularly.
   d. On the resend button set the two minutes timer, after first press to activate the button so that user cannot be able to click twice or thrice at a same time.

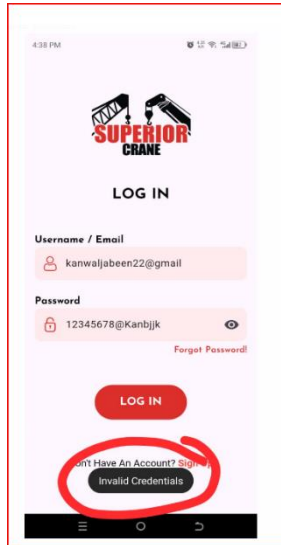

2. **Sign up**
   a. In Name Field User will only be able to add Alphabets
   b. Email icon need to change
   c. Need to add proper email validation e.g (umer@gmail.com, umer@gmail.ae etc) but in this scenario if user not add ".com" or .ae or ".outlook" user signup successfully.
   d. Add Phone Number Field in form with max 15 digits and min 7 digits without accepting Alphabets
   e. Role type on every sign up should be unchecked by default and needs to be in same line.
   f. Change Name of a "Sign Up" button with "Submit"

3. **LOG IN**
   a. Remove Username from Heading
   b. Need to add error under field as label instead of floating underneath

4. **MANAGER**
   a. **Calendar**
      i. Callender should show current date and events in it (if any) on every fresh visit
   b. **Add Job form**
      i. All fields should be mandatory and will be highlighted as red if left blank as right non only four fields are highlighting if left blank
      ii. Job type should always be unchecked on every visit of add job form.
      iii. Every input field is mandatory to be added and asterisk (*) mark should be placed with every heading
      iv. Set the alignments of every heading and subheading of input fields
      v. Set the alignment of width of shaded area of input fields
      vi. Remove Field **"Job Time"** and its button **"Select Time"** from add job form and view form"
      vii. Change **"Date"** heading with **"Job Date"** and its input field (marked with green dot) show date format like "**dd-mm-yy**" instead of **"enter job date here"** and keep the field view only.
      viii. Replace **"Select Date"** (marked with blue dot) button with Callender Icon and color of an icon should be Red as per

theme. Callender pop will also be as per theme of Figma design

ix. Change the Headings **"Start Date and Time"** and **"End Date and Time"** and with **"Start Time"** and **"End Time"** and for their input fields show time format like "**hh:mm**" instead of **"Start/End Date and Time"** and keep both fields view only and place them next to each other

x. Replace both **"Select"** (marked with blue dot) buttons of start and end time with **"Clock Icon"** and remove the popup of Callender from both buttons and only keep time popup as only time will be required here. Clock icon color should be red as per theme and clock pop will also be as per theme of Figma design

xi. Set the validation for End time always be less than Start time and should not be less than current time as right now new job can be made for past dates.

xii. If the job type is selected as

    1. "SCCI (Logistics)" the list Heading **"Rigger Assigned"** would be shown as **"Assign Transporter"** and available user having the user id of "Transporter" and "Both" will appear under it and for

    2. "Crane Job" the list heading would be shown as **"Assign Rigger"** and available user having the user id of "Rigger" and "Both" will appear under it and for

    3. "Other" the list heading would be shown as **"Assign User"** and all available users will appear under it.

    Note: User who is already booked for any job on same date and time will not appear in the listing

    4. User listing LOV should be shown as pop, not the way it is appearing now, the popup should be as illustrated below. Input field Like "Customer Name" will be changed as Search User and on the date section list of users should be shown with scroller to check more, as there is possibility of listing contains large number of users like 100 or 1000.

xiii. Add Text field to add notes in all forms of adding editing and view job

xiv. Change the name "Upload Image" as "Add File" and upon clicking the button show the popup having the items as

    1. Radio Buttons: to choose type of attachment ie "PDF" or "IMAGE"

    2. Title: an Input field to add Title of the attachment and

    3. Upload button to upload respective file.

    Note: Only 1 pdf will be allowed to attach one time and for images maximum 5 images should be uploaded in one time.
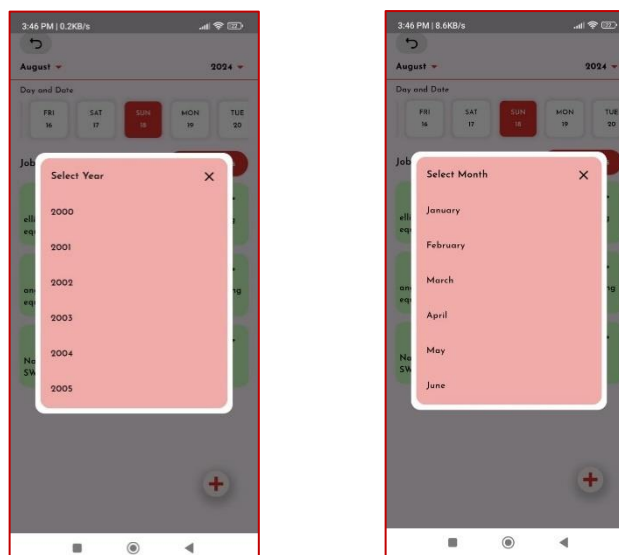

a. The view of the attachments should be sleek and will be shown in two segments
   i. Managers/Admins Attachment: will further segmentize in two (one for each like Pdfs and Images)
   ii. Rigger/Transporter Attachments: will also further segmentize with two (one for each like Pdfs and Images)

   Note: Both segments will show their attachments, after pressing the dropdown icon and they will appear as illustrated below with left and right scrolling if multiple numbers of files are attached. and upon clicking a particular attachment full view should be shown. Moreover, On every attachment X button should be shown to remove file with confirmation popup

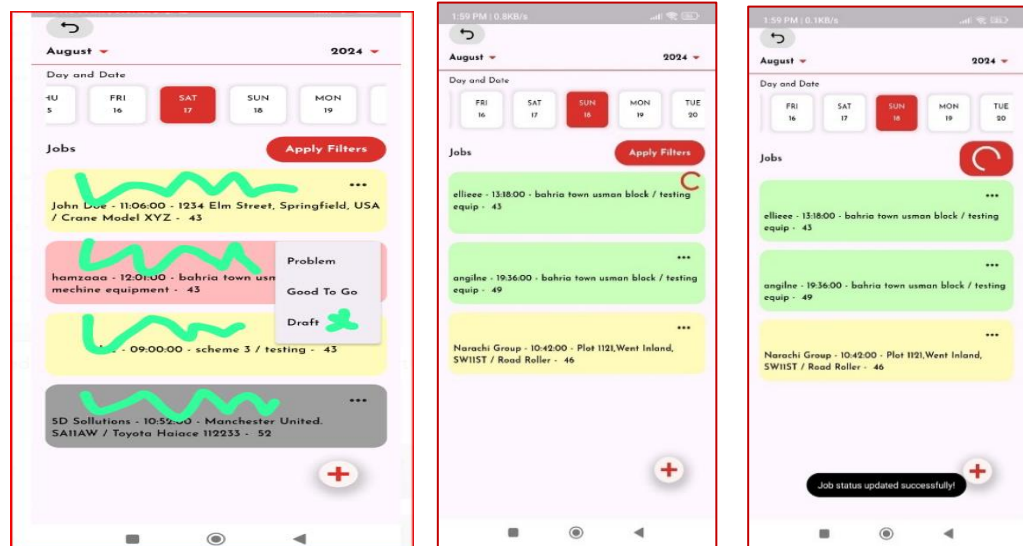

PO Number   Site Guidelines   Task Requirements   SITE SOPs

Crane Site.   Construction Site.   Job Completion   Excavator Site

c. **Callender Job Listing**
   i. Remove or adjust the extra space from the top of the details as marked in green.
   ii. Whilst changing the status loader should be shown on screen instead of showing on a place of three dots and after on a place of Apply filter button.
   iii. With assignee id name should also be shown in detail
   iv. Exclude the seconds from the time in job listing view and show start and end time both in details
   v. Popup for Year and Month should be the same as per figma design just to have uniformity in overall popups

vi. Whilst checking the jobs from random dates from calendar a default message is showing center of the screen as" No event found" even if there is job against the date

vii. Need to add color bars before the job details as same as in admin dashboard to discriminate the job with respect to type.

viii. Needs to add legend drop down to make user aware of the color discrimination

ix. List of Status should be in order of (1st Good to Go | 2nd On Hold | 3rd In Problem) and there is no status as draft. Functionality against them will be run as

    1. Whenever New job will be added the status will automatically be "On Hold" and job will be highlighted as Yellow and the status itself will be highlighted with same color in LOV

    2. Whenever user will mark status "Good to Go" the job will be highlighted as Green and the status itself will be highlighted with same color in LOV and

    3. Whenever user will mark status "Problem" the job will be highlighted as Red and the status itself will be highlighted with same color in LOV

    4. Once any ticket against the job is submitted the job will be highlighted as Grey and the user will not be able to change the status of the completed job.

d. **Apply Filter**

    i. Need to align these field to show sleek view

    ii. Need to add format in date field as dd/mm/yy instead of "Select Date" the field would be view only. And user will only be able to add date upon clicking the Callender icon

    iii. Upon clicking on Callender icon there should be multiple date picker calendar as user need to add range of the dates to see the records within the range of dates chosen.

    iv. Add address field also between customer name and date field to search from address

v. Filter for all fields should run independently. If user only wants search by username filter should work, as right now fields are dependent to each other to apply filter

vi. If user chose the date without clicking on Customer Name fields, it will not appear in date field. it only appears when user click on Customer name field first then date to reflect the date in field.

vii. Filter is not showing the result as per the information provided in filter. as I have chosen the date 23rd Aug, against which no job has been done ever, but the system is showing the data from different dates.

viii. For Filter View date should be included in job details to see which job is against which date

ix. Please improve the view of the listing appears after filter result. Username and Dates for which filter is applied need to be more appealing and presentable

x. In filter popup heading is "Customer Name" however in listing view heading is "Username" Change the User with Client in listing view.

xi. Details of the job here should be the same as per Callender listing view

e. Job View

i. Job Type should also be shown in view job

ii. Supplier Name should need to be added in job view screen

iii. Remove Job Time from view as well

iv. Remove seconds from all time fields

v. Change the headings name "start/end date and time" with Start/End Time. And remove dates from both input fields as well and place them next to each other.

vi. Remove Emails for both Created by and User Assigned

vii. User ID should also be shown before name in view

viii. Show the segment wise attachment in view as well with left and right scrolling to see more, Same as I have explained above in creating job,

ix. Keep the "Created by" below left corner of the Screen and "Updated By" below right corner of the screen after attachments segment

x. Use the same Heading for Client Name everywhere as right now some where it's shown as Customer Name

f. Job Edit Form

    i. Whilst editing the old data in job form old data should be shown as it is. But right now, rigger assigned fields is shown unselected.

    ii. If user want to change job type whilst chaniging the type popup should be shown to adivise user to re select user as upon changing the type assigned user will autmoaticall de linked.

    iii. If user change the job type and change the assign rigger and save the the job and came again to view job it will be shown with old details instead of updated details.

    iv. If user want to change time and date after clicking on change date/time button, callender and clock will show current time instead of showing the already added time

    v. Upon edditing and saving the job status of the job will be set as on Hold autmatically and will be highlighted as Yellow

    vi. Keep the "Created by" below left corner of the Screen and "Updated By" below right corner of the screen after attachments segment
